August 1, 2017

This class was developed to help the beginner gain confidence at the sewing machine. Participants will use the machine as a drawing tool, learning to quilt in complex patterns without the bother of marking or measuring. Demonstrations and explanations of fundamental types of quilting and students will quilt the whole class time.

CLASS KIT – \$20.00: A handbook of Frieda’s quilting patterns that will take the student beyond the basics and one machine quilting needle will be distributed and paid for in.

Supplies:

- **Scissors.**
- **Thread:** Cotton thread in several colors, not white, beige, cream, etc. For example, orange and blue, red and green, or other colors that will contrast. #50 weight thread is best for this class.
- **Quilt Sandwiches:** 6-8 sets of 15" square of cotton, (top, batting and lining). Since we are interested in seeing our stitchery, fabric should be a **SOLID COLOR, or muslin**. Please have sandwiches assembled, not thread basted, **just safety pinned around the outside edges**.
- **Batting:** Cotton batting is preferred, but you may practice on polyester. Please cut your batting to match your fabric... for example, in 15" squares.

It might be helpful to bring a pillow to sit on in case the chairs are low or hard.
